

DISCO *bulletin*

News

2020 has been a rough year, and the pandemic has really affected us all around the world.

DISCO was set on hold for several months because of this situation.

After the summer most of the sites were up and running again and so far there has been no more pauses, however the pandemic is still affecting the recruitment.

Update

Holland have started their first site in Radmoud and are recruiting patients. More sites will follow in the near future.

Denmark have received the approval from the ethic committee and are planning on starting up 4 sites in the beginning of February.

The sites are Odense, Aalborg, Aarhus and Copenhagen.

France are doing all the paperwork necessary for the study to be able to start hopefully before the upcoming summer of 2021.
